

PROFESSIONAL SUMMARY

Entry-level Data Analyst with hands-on experience in data cleaning, analysis, visualization, data modeling, and KPI reporting through academic and portfolio projects. Skilled in SQL, Excel, Power BI, DAX, Power Query, and Python. Experienced in analyzing large datasets, developing interactive dashboards, performing customer segmentation, and transforming data into actionable business insights.

TECHNICAL SKILLS

- **Data Analysis:** Data Cleaning, Exploratory Data Analysis, Data Validation, Data Visualization, KPI Reporting, Business Insights
- **SQL:** MySQL, SQL Server, CTEs, Window Functions, Subqueries, JOINS, GROUP BY, Aggregations
- **Microsoft Excel:** Data Cleaning, Pivot Tables, XLOOKUP/VLOOKUP, Charts, Sorting, Filtering, Basic Reporting
- **Power BI:** Dashboard Development, DAX, Power Query, Data Modeling, Star Schema, Slicers, Drill-through, KPI Development
- **Python:** Pandas, NumPy, Matplotlib

EXPERIENCE

Data Analyst Intern - Cyber Core Technologies, Mohali | Jul 2025 – Aug 2025

- Worked with analytical datasets using Python, SQL, Excel, and Power BI.
- Developed Power BI dashboards using SQL, Excel, and Python to analyze business datasets and present KPI-driven insights.

PROJECTS

E-Commerce Sales & Profit Analytics

- Analyzed 99K+ orders and 95K+ customers to identify sales, product, customer, and delivery trends.
- Built an interactive Power BI dashboard using star-schema data modeling, DAX KPIs, Power Query, slicers, and drill-through functionality
- Developed KPI reporting to analyze sales and profit performance.
- Implemented RFM customer segmentation in Python using Recency, Frequency, and Monetary Value.
- Transformed raw business data into interactive reports to support data-driven insights.

Marketing Campaign Business Performance Analytics

- Analyzed 1,000 marketing campaign records using Python, SQL Server, Excel, and Power BI, evaluating revenue, spend, conversions, CTR, CPA, and ROAS to identify campaign and channel performance trends.
- Built a star-schema SQL Server data model with fact and dimension tables and developed advanced queries using CTEs, window functions, ranking, aggregations, and conditional logic.
- Developed a 5-page interactive Power BI dashboard featuring executive KPIs, audience analysis, campaign/channel performance, and campaign-level drill-downs to support data-driven marketing decisions.

Instagram Analytics Database

- Designed a relational MySQL database for Instagram users and posts.
- Used SQL queries with JOIN, GROUP BY, COUNT, AVG, and ORDER BY to analyze user activity and engagement.
- Cleaned and organized datasets using Excel and SQL.
- Performed data validation, filtering, and duplicate removal.
- Created SQL queries using SELECT, WHERE, GROUP BY, and JOIN for data extraction and analysis.

EDUCATION

Bachelor of Computer Application (BCA)

Government College, Ambala Cantt | CGPA: 9.2

Higher Secondary Education (12th)

XIIth : 83.2%

Secondary Education (10th)

Xth : 100%
